

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previous Presented) A method for tracking a special service delivery by a carrier of a mail item created by an office worker, the method comprising the steps of:

applying a special service indicator to the mail item during creation of the mail item;

sending the mail item to a mail room for final processing prior to submitting the mail item to the carrier for the special service delivery;

automatically detecting at the mail room the special service indicator on the mail item and determining the special service delivery required based on the detection of the special service indicator;

applying at the mail room a unique office worker generated identifier to the mail item, the unique identifier including an electronic address of a company server;

submitting the mail item with the unique identifier thereon to the carrier for the special service delivery;

receiving from the carrier at the electronic address obtained by the carrier from the unique identifier on the mail item information relating to the location of the mail item;

storing the information relating to the location of the mail item at the company server;
and

providing the office worker with access to the company server to obtain the information relating to the location of the mail item.

2. (Original) A method as recited in claim 1, wherein the special service indicator is a specific color associated the special service delivery.

3. (Original) A method as recited in claim 2, wherein at the mail room the specific color is automatically detected and identified to determine the special service delivery required by the mail item.
4. (Original) A method as recited in claim 3, wherein the specific color is selected from a plurality of different colors, each of the plurality of different colors serving as an indicator of a different special service delivery requirement.
5. (Original) A method as recited in claim 1, wherein the special service indicator is a label.
6. (Original) A method as recited in claim 1, wherein the special service indicator is printed on the mail item.
7. (Original) A method as recited in claim 1, wherein the special service indicator is machine readable.
8. (Original) A method as recited in claim 1, wherein the information relating to the mail item includes an image of the mail item.
9. (Original) A method as recited in claim 8, wherein the information relating to the location of the mail item further includes date, time, and location data.
10. (Original) A method as recited in claim 1, wherein automatically detecting the special service indicator is accomplished using a mailing machine.
